Website Handoff Guide

Ashokan Outdoors

Premium Website & CMS

Your complete guide to managing your new website, updating content, and publishing fishing & hiking reports.

Prepared by Advanced Marketing

April 2026

Your Websites

You now have two live websites, both fully hosted and maintained:

MAIN WEBSITE (STATIC)

https://ashokan.advancedmarketing.co

Fast, optimized landing page. Content is code-based.

CMS WEBSITE (EDITABLE)

https://ashokan2.advancedmarketing.co

Full content management system — you can edit everything yourself.

Once you're ready to go live with your own domain (e.g. **ashokanoutdoors.com**), we'll point the CMS version to your domain. See the "Going Live" section for instructions.

What's Included

- Premium responsive design with animations and video hero
- Full CMS admin panel — edit all text, images, services, rates, FAQs
- Blog/Reports system for fishing & hiking reports
- Lead capture form with admin dashboard
- Google Maps embed with directions
- Click-to-call floating button
- Google Reviews section
- SEO optimized (meta tags, Schema.org structured data, sitemap, robots.txt)
- Mobile-first responsive design

COMPLETED FREE

Deep SEO Upgrade

We performed a comprehensive SEO optimization across both sites at no charge. This includes:

- Schema.org JSON-LD structured data (LocalBusiness, FAQPage, WebSite)
- Open Graph & Twitter Card meta tags for social sharing
- XML Sitemap and robots.txt
- Semantic HTML with proper heading hierarchy and ARIA labels
- Optimized image loading and accessibility attributes

Next step: Once the site is live on your domain, we need to submit the sitemap to Google Search Console so Google indexes your pages. We'll handle this for you.

Admin Panel & Login

ADMIN URL

https://ashokan2.advancedmarketing.co/admin

ADMIN PASSWORD

AshokanAdmin2026!

You can also access the admin login from the link in the website footer.

Admin Dashboard Sections

Section	What You Can Edit
Leads	View booking inquiries, update status (new → contacted → booked), add notes, export CSV
Sections	Edit hero headline, about text, Catskill fly fishing content, preparation guide text
Services	Add/edit/reorder service cards (title, description, image, link)
Rates	Update pricing for all services — grouped by Fly Fishing, Hiking, Instruction
FAQs	Add/edit/reorder frequently asked questions
Reports	Write and publish fishing & hiking reports (blog posts) with images
Images	Upload new photos via drag-and-drop, manage your image library
Settings	Business name, phone, email, address, tagline, social links

Writing a Fishing/Hiking Report

1. **Go to Reports in the admin sidebar**

   Click "New Report" to start writing.

2. **Fill in the title, content, and optional cover image**

   Write your report in the text area. Upload a cover photo from the field.

3

Set status to "Published" and save

Reports appear at `/reports` on your website. You can save as draft first.

Hosting & Support

$20

per month

Hosting & Updates Included

What's Included in Your Monthly Plan

- **Managed hosting** on a dedicated cloud server (Contabo VPS)
- **SSL certificate** (HTTPS) — automatically renewed
- **Cloudflare CDN & security** — DDoS protection, caching, fast global delivery
- **Site updates & maintenance** — bug fixes, security patches, minor tweaks
- **Database backups** — your leads and content are safe
- **Email support** — reach out anytime for help

FOR UPDATES & SUPPORT

ben@freewebsitedesign.today

Email anytime for content changes, feature requests, or questions. Updates are included in your plan.

What Counts as an "Update"?

- Text or image changes you can't do yourself in the CMS
- Adding a new section or feature to the site
- Seasonal design tweaks
- SEO improvements and Google Search Console management
- Bug fixes or compatibility updates

For anything you can do yourself (editing text, uploading photos, managing leads, writing reports), use the admin panel. For everything else, just send an email.

Going Live With Your Domain

To use your own domain (e.g. **ashokanoutdoors.com**), we need to route it through Cloudflare. This gives you fast loading times, SSL, and security. Here's what to do:

Step 1: Create a Free Cloudflare Account

1. **Go to cloudflare.com and sign up**

   Create a free account. No credit card required.

Step 2: Add Your Domain to Cloudflare

2. **Click "Add a Site" and enter your domain**

   Enter `ashokanoutdoors.com` (or whatever your domain is). Select the **Free** plan.

Step 3: Update Your Domain's Nameservers

3. **Cloudflare will give you two nameservers**

   They'll look something like: `anna.ns.cloudflare.com` and `bob.ns.cloudflare.com`

4. **Log in to your domain registrar**

   This is wherever you bought your domain (GoDaddy, Namecheap, Google Domains, etc.). Go to your domain's DNS settings and replace the existing nameservers with the two Cloudflare nameservers.

5. **Wait for propagation**

   This can take anywhere from 5 minutes to 24 hours (usually under 1 hour).

Step 4: Add Us to Your Cloudflare Account

> **ADD THIS EMAIL AS A MEMBER ON YOUR CLOUDFLARE ACCOUNT**
>
> ben@freewebsitedesign.today
>
> In Cloudflare: go to **Manage Account** → **Members** → **Invite**. Add the email above with **Administrator** access. This lets us configure DNS and SSL for your domain.

Step 5: Let Us Know

Once you've done steps 1–4, email **ben@freewebsitedesign.today** and we'll:

- Point your domain to your website
- Set up SSL (HTTPS)
- Submit your sitemap to Google Search Console

- Verify everything is working

> **That's it! Once your domain is on Cloudflare and we're added as a member, we handle everything else. Your site will be live on your domain within minutes.**
